The following is an examiner's statement of reasons for allowance: In the industrial production of ethylene oxide, applicants' method of switching from a process where a high activity epoxidation catalyst to one where a high selectivity catalyst is used which involves among other things lowering the concentration of carbon dioxide in the feed to the latter is novel and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
